

Project Reports & Feasibility Studies

In VAT we guide our clients from the inception of conceiving the business idea. We study in detail the business idea and then prepare a project report that will include the project feasibility and financial feasibility along with our recommendations for changes that may be needed to make the project operationally and financially a viable one.

Some of the studies include

1. Diagnosing the business idea through SWOT analysis
2. Financial modeling, IRR, NPV etc
3. Sensitivity and scenario analysis
4. Cash Flow projections to understand and

mitigate cash flow gap

5. Sourcing the investors for new and existing business
6. Operational and technical guidance from knowledge base
7. Special Report on project processes and operations
8. Report on regulatory, tax and legal requirements

The most critical thing that makes a business project successful or unsuccessful is how thorough we are with the project's operational and financial feasibility reports and useful information even before venturing into that business.

Our Feasibility Study includes:

1. Industry assessment
2. Market analysis
3. Competitive scenario analysis
4. Financial feasibility and pre-feasibility studies
5. Financial projections
6. Location and site evaluation
7. Business life cycle analysis
